

SUPERVISOR APP

Enabling Face Recognition and Auto-Sync

To use **facial recognition** on a mobile device, the function needs to be enabled within the **Supervisor App**. Good practice is to also enable the **Auto-Sync** function. This ensures your device can send and receive the latest data from **MSite** automatically when connected to the internet.

Face Recognition and Auto-sync

Settings

When logged into the Supervisor app, you will need to select the **cog icon**  to access the **settings** page.

Auto-Sync

Enable **Auto-Sync** by selecting on the **slider** so that it turns **Green**.

Use Front Camera

Enable **Use Front Camera** by selecting on the **slider** so that it turns **Green**.

Face Recognition

Enable **Face Recognition** by selecting on the **slider** so that it turns **Green**.
