

MSITE REPORTS

Local Labour Reports

MSite Reports allows the user to run reports covering Local Labour, offering the option to breakdown by Site, Date & Contractor in a summary or detailed view.

Local Labour

- Select the **Reports** option in the MSite Toolbar on the left-hand side of the screen, then select either **Local Labour** or the more detailed **Local Labour Breakdown**.

- Select the criteria the report is to be ran using options such as:
 - Date Range
 - Site or all sites
 - Individual Contractor or all Contractors

[Worker Statistics](#)
[Worker Travel to Site Carbon Emissions](#)

Local Labour

Shows the number of Workers within each distance bracket and the number of days worked by them. Distance is calculated using the Worker's and the site's postcode (as the crow flies). Days are calculated in one of two ways:
 • Any attendance = any attendance on a day counts as one day, regardless of time spent on site.
 • Actual hours = uses PLO hours to calculate the actual time spent on site for each Worker. Data is provided in days, hours and minutes.
