

# Face Mini - Liveness Detection

## Device Requirements:

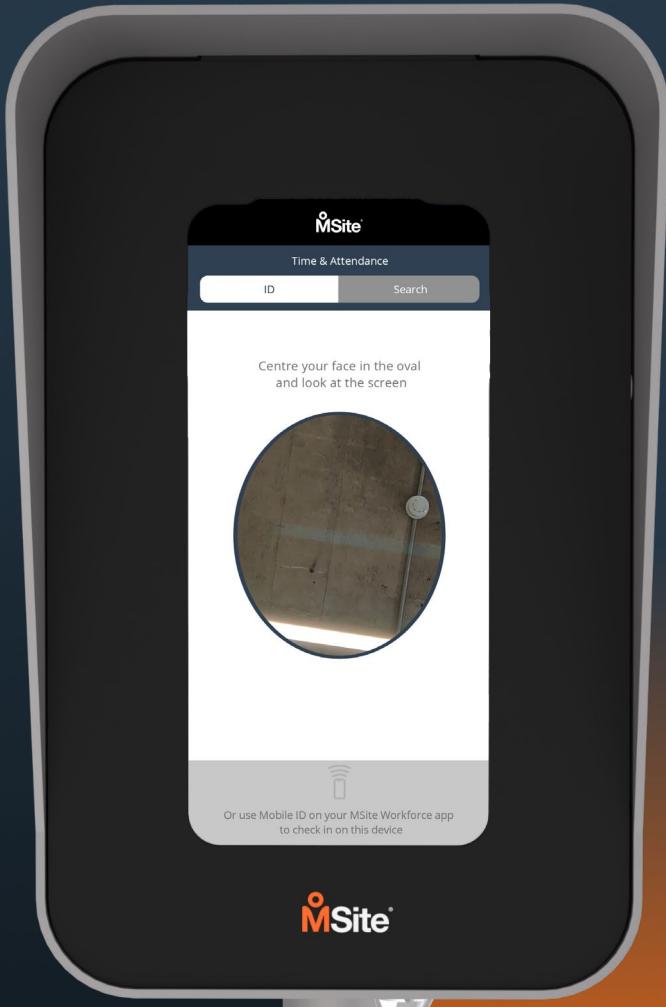

- The device **MUST** be running iOS.
- The device running the App **MUST** have a 3D camera (Please refer to the last page for a list of compatible devices).

# Face Mini – Liveness Detection

## System, App & User Requirements:

- Face Recognition and Liveness Detection **MUST** be enabled for the device. This can be managed through the Mobile Devices page.
- The User logged into the Supervisor App **MUST NOT** have the 'Mobile – Manual Search' User Role.
- The Supervisor App settings **MUST** have the 'Use Front Camera' & 'Face Recognition' features enabled.
- The Supervisor App **MUST** be in Kiosk Mode (An indication of whether the App is in Kiosk Mode or not would be if the MSite banner at the top of the Face rec screen is black. If it is black, this means the App is in Kiosk Mode).

# Face Mini - Liveness Detection
