MSite Enrolment Station

MSite Enrolment Station

The Enrolment Station is used to enrol user's biometric details onto the MSite system.
it consists of the following:

- A PC
- Card Printer*
- Card Reader

- Webcam
- Enrolment biometric reader

This must be present on all sites with an MSite Pod, Turnstile or Touch unit.

Required of customer prior to install of the MSite Enrolment Station

- 2 x 3 pin power socket.
- Table space for monitor.
- Open internet access available at the location via LAN (we need static IPs provided by site IT) or Wifi with Ports 80,443,1400, 1401 1402, 1403, 1404 open.

- Keyboard / Mouse.
- Small USB Enrolment Reader.
- If cabling from PC to access points (max distance 80m) then a secure cable route between these locations is required.

*Not required for Fingerprint Recognition or face
