

# Access Control

Smarter site security with real-time workforce tracking.

**Raises Site Standards**

**Reduces Risk & Errors**

**Removes Modern Slavery**

Keep your construction site secure with biometric turnstiles, tracking worker arrival and exit times. You can run reports on actual time spent on site by workers or sub-contractors.

## Accurate Time & Attendance

Biometric verification ensures trusted workers access site. Monitor activity in real time and block anyone not meeting requirements.

## Actionable Workforce Insights

Access real-time data on worker attendance and activity to improve efficiency, reduce costs, and simplify site management tasks.

## Enhance Site & Worker Safety

Improve overall safety by restricting unauthorised access and ensuring only trained, compliant workers are allowed on site.

## Carbon Tracking Integration

Integrate with supply chain systems to analyse and track carbon footprint of materials from initial procurement through on-site usage.

## Fast, Reliable Face Recognition

Quickly verify workers with accurate facial recognition. Automatically restrict access based on compliance, training, and site-specific requirements.

## Adaptive Access Permissions

Automatically update access rights based on shifts, roles, or emergencies to maintain security and operational flexibility.
