Fatigue
Management

## Fatigue insight that keeps your site one step ahead.

Raises Site Standards

Reduces Risk & Errors

MSite Fatigue Management enables monitoring of your site team fatigue levels throughout your project - keeping your site safe. Ensure your team aren't making mistakes by guaranteeing they're well-rested and not overtired.

Improve Productivity

Keep your workforce alert and focused by identifying fatigue risks early. Reducing errors, improving efficiency, and increasing on-site visibility.

Automated Fatigue Risk Reporting

Track hours worked, commute times, and rest days with digital reports auto-formatted for the HSE Fatigue Risk Calculator.

Support Compliance

Meet health and safety obligations, including ROGS and other regulations, with built-in fatigue monitoring and reporting tools.

Enhance Workforce Wellbeing

Proactively managing fatigue supports healthier work patterns, helping to reduce stress, burnout, and long-term health issues across your workforce.

Highlight Fatigued Workers

Identify at-risk workers in real time to take mid-shift action, reducing the chance of incidents, accidents, or injuries.

Data-Driven Decision Making

Use real-time fatigue insights and historical trends to inform shift planning, optimise resource allocation, and improve site safety outcomes.

Be safe. Be productive. Be one.
