

Identity Checks

Stay ahead of compliance, screen smarter with MSite.

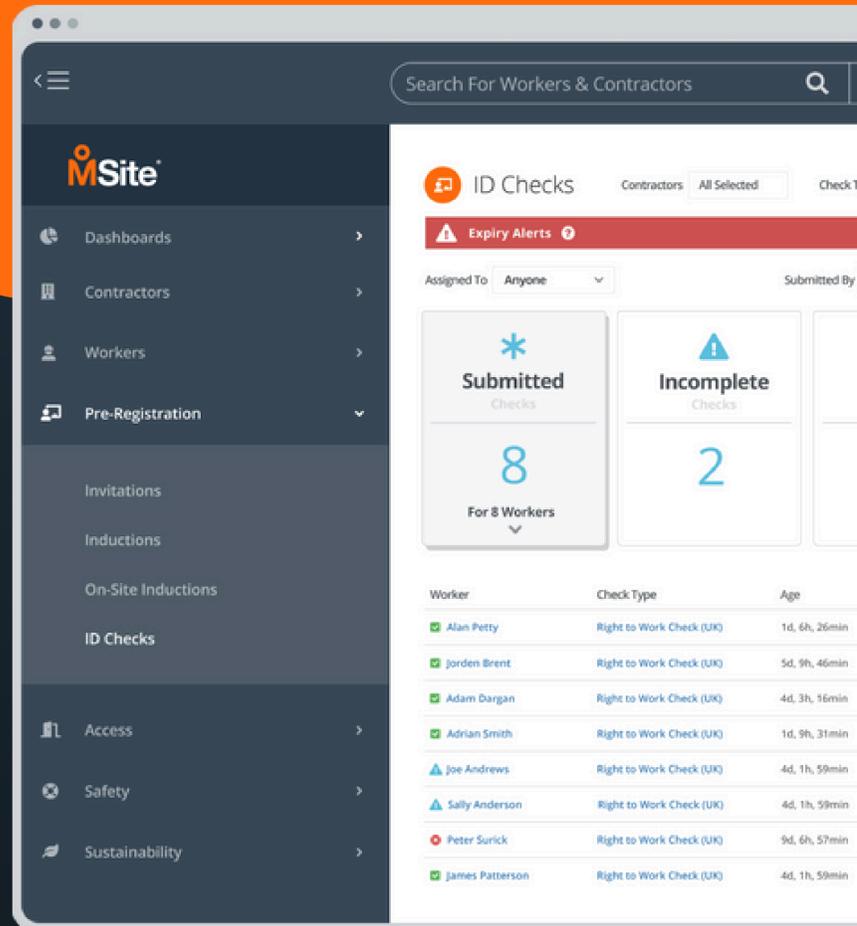

Reduces Risk & Errors

Removes Modern Slavery

MSite Enhanced Vetting enables management to order physical checks of competency and right-to-work documentation from their workers, as a part of the workforce registration process.

Improved Site Safety

Workers can self-register and complete inductions online, ensuring they're compliant and ready before arriving on site.

Right-to-Work Verification

Our contractor vetting solution supports share codes, Frontier Worker Permits, and other requirements under updated Home Office legislation (effective from 1st July 2021).

Support for Ethical Practices

Help combat modern slavery by verifying every worker's right to work, including visa and permit documentation.

Enhanced Worker Screening

Set up advanced verification workflows, such as DBS checks, for projects requiring higher security—ideal for sensitive sites like schools or public sector facilities.

Stay Compliant

Avoid costly fines and legal issues by ensuring only properly vetted workers are granted site access.
