

# Pod

Smart, Secure Site Access in Seconds.

Support Social Value

Raises Site Standards

Reduces Risk & Errors

The MSite Pod is a secure, full-height turnstile unit with biometric access. Ideal for controlling site entry based on worker compliance and credentials.

## Robust site security

Accurately manage who is on your site and if they have the right to be there through impressive biometric technology.

## MSite Integration

Integrated software enables you to automatically restrict site access of workers against your sites criteria.

## Fire alarm Integration

Seamlessly integrate your site turnstile unit with a wireless fire alarm system to automatically set the turnstile to free spin the moment an alarm is triggered.

## Time & Attendance Insights

Time & Attendance data gathered can be used to improve operations, for example reviewing actual hours worked vs planned hours.

## Social & Safety KPIs

Report on social value, local labour, carbon footprint and apprentices on site. Also health & safety KPIs such as worker to supervisor ratios, training log and worker competencies.
