

RAMS

Simplify Site Safety with MSite's Digital RAMS.

Saves Time & Money

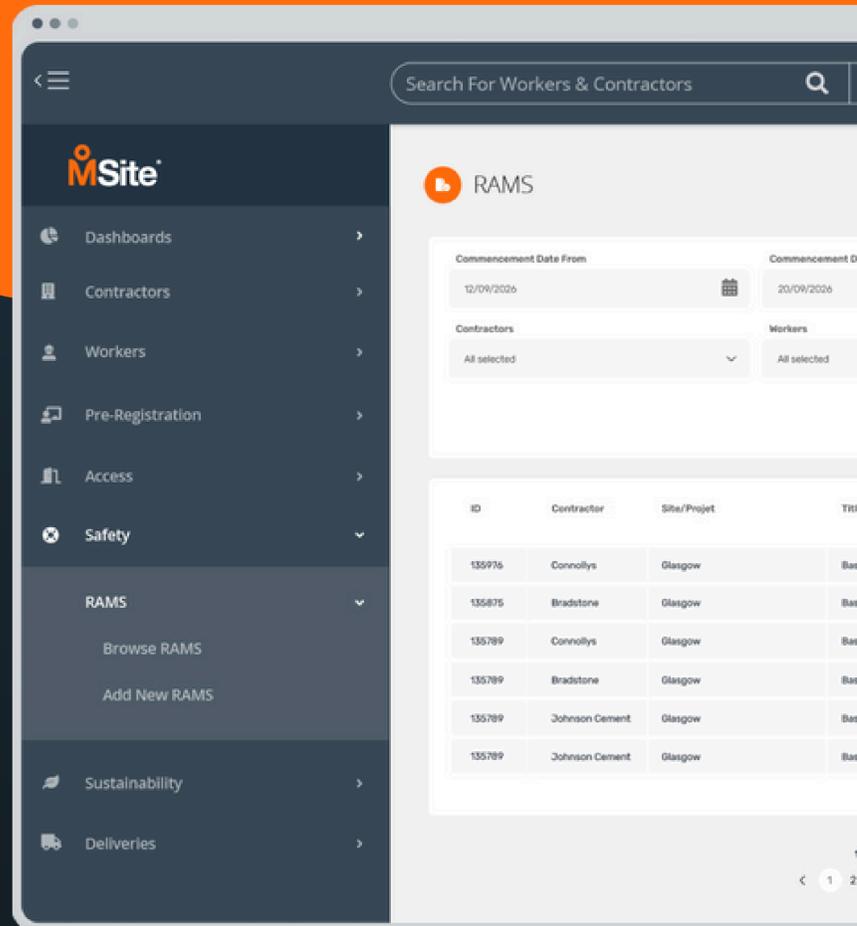

Raises Site Standards

Reduces Risk & Errors

The RAMS module simplifies the entire RAMS process by enabling subcontractors to upload their documents for site team approval, then automatically generating a briefing for workers to digitally acknowledge with their signatures.

Improved Productivity

Significantly reduce admin time, manual handling of documents and secure digital records.

Future-Proof Compliance

Digital signatures confirm each worker accepted RAMS via their MSite profile, simplifying audits and ensuring real-time safety visibility through the Supervisor App.

All-in-One Platform

Manage worker onboarding, training, time & attendance, briefings and RAMS centralised against an action taken on site and the workers who carry out that activity.

Minimise Admin, Maximise Safety

A central digital record cuts admin and lost paperwork. In emergencies, site teams instantly verify compliance and access vital information.

Safety-First Approach

RAMS integrates with MSite competency rules engine giving site teams confidence that every worker has signed a RAMS or they won't get access to site.

Streamlined RAMS Workflow

Contractors upload RAMS directly to MSite, cutting out emails and paperwork. Site managers review quickly, with workers sent briefing content automatically.
