

Visitor Management

The Smart Way to Secure Your Site.

Reduces Risk & Errors

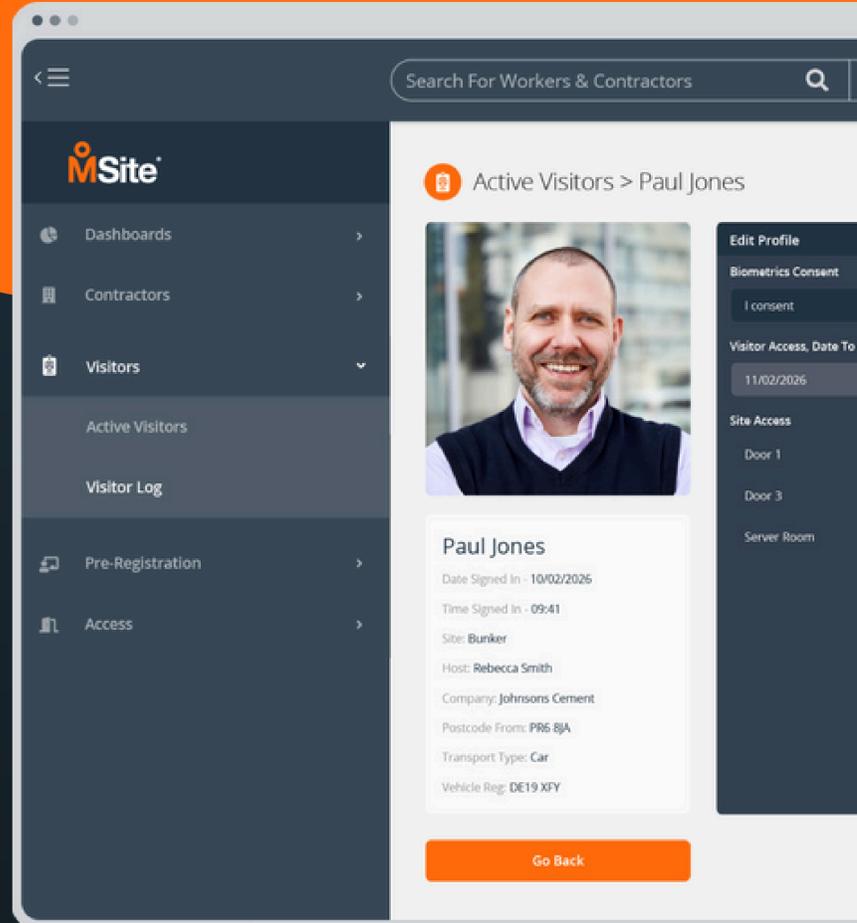

Raises Site Standards

Saves Time & Money

MSite's integrated Visitor Management module allows for quick visitor registration and automatic inclusion in the site roll call. Enhance site security with a fully pre-registered and trackable visitor system.

Self-Service and Host-Led Options

Use the Face Mini for fast, self-service check-ins, or let site personnel guide the process with the Supervisor App. Ideal to meet all site requirements.

Integrated Access Control

Provide temporary site access using MSite's face recognition or visitor cards, ensuring robust security without juggling separate systems.

Pre-Registered & Walk-In Support

Schedule in appointments and cater for impromptu guests alike. Repeat visitors can also be recognised and processed even faster.

Scalable Compliance

MSite ensures visitors meet safety requirements, captures key details, confirms inductions, and delivers real-time reporting and roll calls to simplify audits.

Customizable Data Capture

Collect visitor details like vehicle registration and visit reason to meet your site's unique security, compliance, and ESG reporting needs.

Real-Time Oversight

MSite provides live dashboards and automated logs, giving site teams full visibility of visitors to ensure fast response and secure, compliant operations.
