Face

Fast, Secure Access with Smart Facial Recognition.
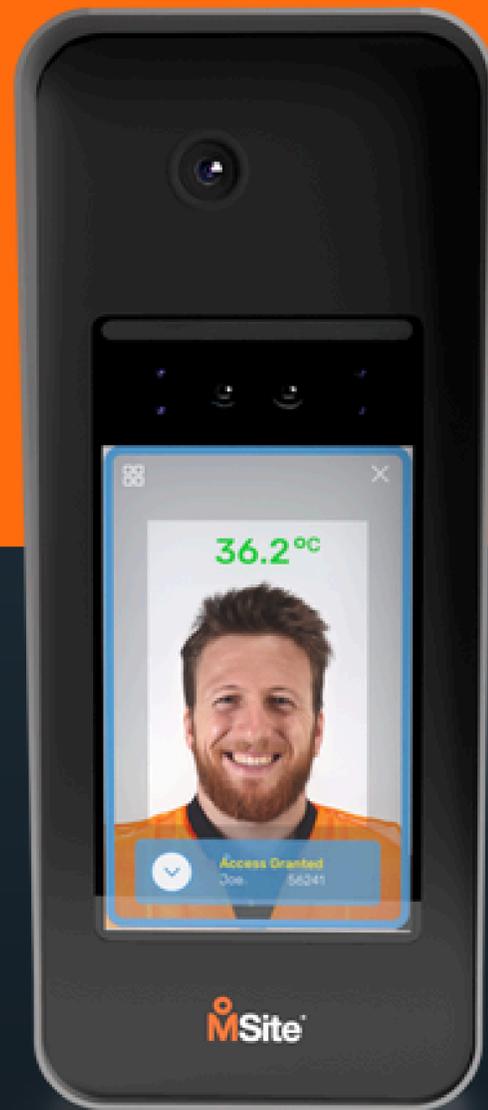

Saves Time & Money

Raises Site Standards

Reduces Risk & Errors

MSite Face is a highly accurate facial recognition solution that integrates with our access control equipment such as Pods and turnstiles. It biometrically verifies worker identity and allows workers access to sites, based on their user permissions and qualifications.

MSite®

Contactless sign in and site access

Automatically blocks site access if operatives don't have the correct permissions.

Simple Enrolment

Quickly enrol workers using the MSite system, CITB database, or a standard webcam for seamless setup.

GDPR Compliant

All worker data is securely encrypted, ensuring full compliance with GDPR and data protection regulations.

Reliable Facial Recognition

Infrared sensors deliver fast, accurate facial recognition even in low-light environments.

Anti-Spoofing Protection

Advanced technology detects and blocks spoofing attempts using photos or 3D masks, ensuring only verified workers gain access.

Real-Time Syncing

Instantly updates worker access status across all connected devices, ensuring accurate permissions and site-wide consistency.

Be safe. Be productive. Be one.
